San José State University
Department of Biomedical Engineering
BME 115, Foundations of Biomedical Engineering, Fall 2020

Course and Contact Information

Instructor: Patrick Jurney
Office Location: ENG 233L (Zoom ID: 9565613016)
Telephone: (408) 924-3921
Email: patrick.jurney@sjsu.edu (preferred)
Office Hours: Zoom ID: 97979201875
Passcode: 435353
Tuesday: 3:00 – 4:00 PM
Thursday: 3:00 – 4:00 PM
(Or by Appointment, Zoom ID: 9565613016)

Class Days/Time: Tuesday: 1:30 – 2:45 PM
Thursday: 1:30 – 2:45 PM

Classroom: Details regarding Zoom links for synchronous sessions will be posted on Canvas.

Prerequisites: Engr 010, Chem 001B, Math 032, Phys 050, Biol 030

Course Format

The course adopts a combination of asynchronous lectures posted to Canvas and Youtube as a primary teaching method, combined with synchronous problem-solving sessions. Short quizzes (either embedded in lectures, via iClicker during problem solving sessions, or online via Canvas) will be assigned in review of the course material. Materials from the textbook or provided by the instructor will be reinforced with homework assignments. A term paper and presentation will also be completed covering a topic of the student’s choosing within the field of Biomedical Engineering. Each student is required to have access to an internet-connected device in order to access synchronous and asynchronous course content. This course incorporates a required lab component (BME 115L), for which a separate syllabus is provided.

Faculty Web Page and MYSJSU Messaging

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on the course website on Canvas. All communications relevant to the course will be sent out using the Canvas messaging system (Canvas email and announcement board). You are responsible for regularly checking with the messaging system through Canvas to learn of any updates.

Course Description

Introduction to the fundamental principles of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics provide a breadth of exposure in cell and molecular biology, diagnostics and analytical techniques, statistical analysis of biomedical
data, bioinformatics, bioinstrumentation, FDA regulations, and biomedical ethics. Prerequisite: BIOL 30, CHEM 001B, ENGR 010, MATH 032 and PHYS 050. Misc/Lab: Lecture 3 hours / Lab 3 hours

BME 115 is the first BME course in the suggested sequence for the BS major, and required prerequisite for the MS BME degree. The purpose of this course is two-fold: introduce students to the breadth of the field and establish core engineering and problem solving skills applicable across biomedical engineering disciplines.

Course Goals

Course Learning Outcomes (CLO)

Upon successful completion of this course, students will be able to:

- **Identify** basic components of biological systems and their function
- **Apply** engineering approaches and prescribed problem solving techniques to modeling biological systems
- **Apply** accounting and conservation equations to mass, energy, and charge.
- **Perform** laboratory experiments and obtain measurements from living systems.
- **Analyze** ethical issues surrounding biomedical engineering practice
- **Describe** recent advances in biomedical engineering within the context of existing knowledge and technology
- **Investigate** novel biomedical engineering techniques by doing an in-depth research paper and presentation
- **Work** in teams to complete specified course assignments; namely laboratory work and term paper/presentations
- **Apply** quantitative skills learned in class to evaluate advances in biomedical engineering (via term paper/presentation)

Required Texts/Readings

**Required textbook**
- Madihally S.V., Principles of Biomedical Engineering, Artech House; 1st Edition (2010), electronic version (.pdf) available free of charge to SJSU students via the MLK library.

**Recommended textbooks**

**Other Readings**

**Other technology requirements**

iClicker (formerly REEF Polling)

You will have several options available to participate in clicker sessions:
iClicker REEF app (iOS, Android, web app): Allows you to use your smartphone, tablet, or even laptop in class as a clicker to participate.

Clicker Remote: You can request to borrow a Clicker remote from eCampus (eCampus@sjsu.edu) for free. Remotes are to be returned to eCampus at the end of the semester.

**How to set up an iClicker account and add a course**

Follow the instructions available on the iClicker Reef (checklist) at http://www.sjsu.edu/ecampus/teaching-tools/reef/index.html.

**Library Liaison**

Anamika Megwalu  
Phone: (408) 808-2089  
Email: anamika.megwalu@sjsu.edu

**Course Requirements and Assignments**

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practice. Other course structures will have equivalent workload expectations as described in the syllabus. More details about student workload can be found in University Syllabus Policy S16-9 at http://www.sjsu.edu/senate/docs/S16-9.pdf.

Attainment of the learning objectives (as listed above) will be assessed via homework, quizzes (via iClicker, or in Canvas), two midterm examinations, the final examination, the term paper and presentation, and the assignments for the lab component (BME 115L).

**Homework**

Students are expected and encouraged to work together on assignments. However, submitted homework should be individual work. Homework must be turned in at the beginning of class on the due date. Late assignments will be assessed 50% off of the maximum possible score. Homework not submitted prior to evaluation and return will be given a score of zero.

**Synchronous quiz (iClicker)**

There will be regular quizzes during problem-solving sessions. iClicker will be used as a student response system. iClicker helps the instructor to understand what you know and gives everyone a chance to participate in class. iClicker will NOT be used to keep track of attendance. Refer to the Grading Policy and Student Technology Resources section for additional details on iClicker.

**Midterm examinations**

There will be two mid-term examinations. Each examination will cover the entire course material covered until the time of the examination. Examinations may include multiple-choice questions, open-ended questions, and problems. During the exam, students can have only a non-programmable scientific calculator. Internet-connected devices, books and notes are not allowed unless explicitly specified by the instructor. The dates of the midterms are indicated in the Lecture Schedule.
Final Examination

The final examination will be held on the date and time stipulated by SJSU’s Final Examination Schedule. The final examination will cover the entire course material covered during the semester. The final examination may include multiple-choice questions, open-ended questions, and problems. During the exam, students can have only a non-programmable scientific calculator. Internet-connected devices, books and notes are not allowed unless specified by the instructor.

Laboratory

Students will work in teams to complete the laboratory activities. After each laboratory, student teams will submit a lab worksheet or report. See BME 115L syllabus for details. Students will keep individual laboratory notebooks. Students should write down all preliminary calculations, procedures, notes on results, and errors made during the experiment.

Term paper and presentation

All students are required to prepare a term paper on a subject relevant to the biomedical engineering, and present it in class during a dedicated session. The requirements for the term paper and the evaluation criteria will be posted on Canvas. Teams of two students will collaborate on a subject of their choice. The term paper must include an Acknowledgments section indicating the specific contributions of each student. Students with no contribution will receive no credit for the term paper.

The term paper must be prepared in accordance with the Biomedical Engineering Department’s Thesis Guidelines (posted on Canvas). One electronic copy of the term paper must be submitted to Canvas in one of the accepted formats (.doc, .docx, .pdf) by the assigned deadline.

Students must cite any and every source of data or information used in the term paper. Quoting verbatim (i.e. “copy and paste”) from papers, textbooks, websites or other is strongly discouraged. Very limited use of verbatim quotes is acceptable only if (1) the quoted text is short, (2) quotation marks are used to delimit the quoted text, and (3) an appropriate reference is provided, with a citation number added immediately after the quoted text. Failure to comply with this requirement may be interpreted as plagiarism, which constitutes a violation of academic integrity. All term paper submissions will be automatically scanned in Turnitin to locate matching or similar text within the paper. The instructor will decide whether there is plagiarism case-by-case, in which case academic and administrative sanctions will be assigned according to the University Academic Integrity Policy S07-2 (http://www.sjsu.edu/senate/docs/S07-2.pdf).

Late submissions of the term paper are strongly discouraged. However, under exceptional circumstances and pending instructor approval, in case of late submission of the term paper will trigger a 50% penalty.

No submission will be accepted later than three days after the deadline. Please note that this late submission policy only applies to the term paper assignment.

NOTE that University policy F69-24 at http://www.sjsu.edu/senate/docs/F69-24.pdf states that “Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading.”

Grading Information

Letter Grades:

A plus = 97 to 100%
A = 93% to 97%
A minus = 90% to 93%
B plus = 87% to 90%
B = 83% to 87%
B minus = 80% to 83%
C plus = 77% to 80%
C = 74% to 77%
C minus = 70% to 73%
D plus = 67% to 70%
D = 64% to 67%
D minus = 60% to 63%

F = 60% or lower

Determination of Grades
Grades will be determined based on all the assignments and examinations, weighted as reported in the table below:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework and Quizzes</td>
<td>5%</td>
</tr>
<tr>
<td>Midterm 1</td>
<td>15%</td>
</tr>
<tr>
<td>Midterm 2</td>
<td>15%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>30%</td>
</tr>
<tr>
<td>Term Paper</td>
<td>10%</td>
</tr>
<tr>
<td>Presentation</td>
<td>10%</td>
</tr>
<tr>
<td>Laboratory</td>
<td>15%</td>
</tr>
<tr>
<td>Extra-credit (iClicker)</td>
<td>up to 4%</td>
</tr>
</tbody>
</table>

Participation with iClicker and lecture quizzes will be extra credit assignments. You will receive 1% extra credit on your final grade for if you participate in 75% of iClicker polls and you will receive 1% extra credit on your final grade for every 33% of lecture quizzes that you complete over the course of the semester.

Failure to complete examinations as scheduled, without prior approval, will result in a zero. Prior approval will be given only under exceptional circumstances. Please contact the instructor as soon as possible if you have such a situation.

Note that “All students have the right, within a reasonable time, to know their academic scores, to review their grade-dependent work, and to be provided with explanations for the determination of their course grades.” See University Policy F13-1 at http://www.sjsu.edu/senate/docs/F13-1.pdf for more details.

Classroom Protocol

Attendance and arrival times
Students are expected to be set up for lecture by the time the class begins. Attendance in class is not mandatory and shall not be used per se as a criterion for grading. However class attendance and participation are highly recommended.

Behavior
Students should remain respectful of each other at all times. Students will respect a diversity of opinions, ethnicities, cultures, and religious backgrounds. Interruptive or disruptive attitudes are discouraged. While in the classroom, the use of electronic devices (laptops, tablets, smartphones) MUST be limited to activities closely related to the learning objectives. While in the classroom, electronic devices should not be used for personal communication, included messaging and use of social media. All cell phones must be silenced prior to entering the classroom.
Safety
Students should familiarize themselves with all emergency exits and evacuation plans. In particular, if the class meeting ends in the evening, students should be aware of their surroundings when exiting the building, and are encouraged to carry a cell phone for emergency communications.

University Policies
Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs’ Syllabus Information web page at http://www.sjsu.edu/gup/syllabusinfo/. Make sure to review these policies and resources.

Academic Integrity
Your commitment, as a student, to learning is evidenced by your enrollment at San Jose State University. The University Academic Integrity Policy F15-7 requires you to be honest in all your academic course work. Any incident of academic dishonesty during an exam will result in an F in the course and the incident will be reported to the Office of Academic Affairs for additional review and possible sanctioning. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. Visit the Student Conduct and Ethical Development website for more information.
